1. **PURPOSE.** This Manual provides cutters with health services personnel assigned the required basic stock levels of health care materials. It is re-promulgated because of numerous formatting changes. Revisions affecting content are summarized below. Intended users of this directive are all Coast Guard units that maintain Health Services Allowance Lists, Afloat.
2. **ACTION.** Area and district commanders, commanders of maintenance and logistics commands, commanding officers of headquarters units, assistant commandants for directorates, Chief Counsel and special staff offices at Headquarters shall ensure that personnel procuring health services material carefully follow the instructions contained herein.
3. **DIRECTIVES AFFECTED.** Health Services Allowance List, Afloat, COMDTINST M6700.6D is hereby cancelled.
4. **SUMMARY.** Reference (a) has been changed making revisions to this document necessary. Pen-and-ink changes published in reference (b) have been incorporated and minor changes have been made to unit requirements to better reflect actual unit need. Significant changes to content are summarized below.
 - a. Chapter 1-C-4 removes all commercially procured texts and adds commercially procured texts required by reference (a) and includes deletions and additions to publications and directives promulgated by reference (b). Additionally, the requirement to maintain Cold Injury, NAVMED P-5052-29, Chapter 29 and Poisons, Overdoses, And Antidotes NAVMED P-5095 is deleted;

 - h. Chapter 2-F-4, Figure (2-5) updated to add requirements for Surgical Gloves, size 6-1/2 and maintain Diazepam injection 5 Mg/Ml, 2 Ml AutoInjector Syringe in the PML in war time;
 - i. Chapter 2-F-5, Figure (2-6) updated to maintain Diazepam injection 5 Mg/Ml, 2 Ml AutoInjector Syringe in the Decontamination Locker in war time;
 - j. Chapter 3-B-1 updated to reflect pen and ink change promulgated by reference (b). Note – Refrigerator, Mechanical Biological was omitted in error when M6700.6D was published. It is included and marked as new in this change but is not a new item;
 - k. Chapter 4-B-1 changed to reflect controlled status of medication;
 - l. Chapter 4-B-2 updated to reflect pen and ink change promulgated by reference (b), increase required quantity of Ciprofloxacin HCL 500 Mg tabs, Doxycycline 500 Mg tabs, and add requirement for Amoxicillin 250 mg chewable tablets;
 - m. Chapter 4-C updated to remove bropheneramine and phenylpropanolamine elixir and add tripolodine and pseudoephedrine syrup as promulgated by reference (d);
 - n. Chapter 6-B updated to add requirement for Class 2C vessels to have equipment and supplies necessary for collection of required post-mishap clinical laboratory specimens;
 - o. Chapter 7-A updated to reflect pen and ink change promulgated by reference (b).
5. CHANGES. All changes to this Manual will be promulgated by consecutively numbered changes. Additions, deletions, and other changes will be published as Commandant Notices.
6. DISTRIBUTION. No paper distribution will be made of this Manual. Official distribution will be via the Coast Guard Directives System CD-ROM and the Department of Transportation Website <http://isddc.dot.gov/>. An electronic version will also be made available via the Commandant (G-WK) Publications and Directives website.

CHAPTER 1. HEALTH SERVICES ALLOWANCE LIST INSTRUCTIONS

A. General Information.

1. The information and requirements contained in this Manual apply to all vessels with health services personnel assigned (Class 2 units).
2. This Manual contains lists of required health care materials (reference books, pharmaceuticals, medical and dental equipment/ supplies, etc.) necessary for initial outfitting and ongoing operation of Class 2 Coast Guard units.
3. Health Services Allowance List (HSAL) quantities represent required inventory of equipment and supplies. Units must maintain these minimum quantities onboard at all times. In some cases (e.g. HS Formulary drugs), the afloat HS may be tasked with determining the necessary quantities based on their personal product preference and maintaining a sufficient quantity of those items. Each chapter in the instruction will address specific issues regarding excess quantities allowed or the stocking of products other than those listed. Generally, a 90 day supply is the desired inventory level for all required expendable items. Variations from or additions to authorized items requires approval of Commandant (G-WKH).
4. Complete requisitioning instructions for the items contained herein are included in Medical Prime Vendor Program Implementation within the Coast Guard, COMDTINST M6740.2 (series). Assistance with Prime Vendor procurement can be obtained by contacting the Coast Guard clinic that supports your unit or Maintenance and Logistic Command (k).
5. Commandant (G-WKH) will make changes to this Manual as required due to therapeutic advances, product availability changes, and mission requirement changes. To ensure timely dissemination of information, changes may be made via medical logistics messages with the changes being numerically identified. Units should reference these medical logistics messages in making “pen and ink” changes to the HSAL until a change or reissue of this directive.
6. Units and/or individuals are encouraged to provide updated supply information or suggestions for improvement to the responsible organizational point of contact listed in each chapter.
7. When modifications are made to required items, information will be given as to disposition of the deleted item. When possible, units will be notified to replace deleted items with the newly required items only when new purchase is necessary due to expiration, contamination, or exhaustion of current supplies.

B. Explanation of Class 2 Unit Categories.

1. Coast Guard vessels with health service personnel assigned.
 - 2A Ice breakers WAGB
 - 2B High Endurance Cutters WHEC
 - 2C Medium Endurance Cutters WMEC, WAGB (Mackinaw only)
 - 2D Seagoing Buoy Tenders WLB

C. Obtaining References and Publications.

1. Most required publications are civilian-published reference books from an “open purchase” source. For each of these, a suggested source will be given. Other sources may exist to obtain the same reference book. When in doubt, contact the publisher or a local bookstore for procurement information.
2. Government publications should be requisitioned directly from the stocking point as indicated by the Routing Identifier.
3. All required G-WK publications may be printed from the Coast Guard Directives System CD-ROM, the Department of Transportation Website <http://isddc.dot.gov/> or the Commandant (G-WK) Publications and Directives website <http://www.uscg.mil/hq/G-W/g-wk/g-wkh/g-wkh-1/Pubs/Pubs.Direct.htm>.
4. General required publications for Class 2 units are:

Medical Manual, COMDTINST M6000.1(series)	1 Copy
Health Services Allowance List, Part 2 (Vessels), COMDTINST M6700.6 (series)	1 Copy
Medical Prime Vendor Program Implementation within the Coast Guard, COMDTINST M6740.2	1 Copy

Unless otherwise indicated, all commercial references may be the current edition or a prior edition published within the last 3 years.

D. Ordering Supplies and Equipment.

1. After initial outfitting, funding for expendable items listed in this Manual is the unit's responsibility. For items costing more than \$300.00, units should submit a U.S. Coast Guard Health Care Equipment Request (CG-5211), to Maintenance and Logistics Command (k).
2. Units should procure expendable supplies via clinic designated by MLC. General and specific information concerning open purchase procurement should be obtained from the CG's Comptroller Manual, COMDTINST M4855.1.
3. Comprehensive procurement information may be obtained from CG Accounting Manual COMDTINST M7300.4 and Medical Prime Vendor Program Implementation within the Coast Guard, COMDTINST M6740.2 (series).

E. Ordering Health Care Equipment (HCE).

1. All HCE replacements should be requested in accordance with Medical Manual COMDTINST M6000.1B.
2. The following items are considered HCE. Information may be found on the particular items in the designated chapter of this Manual.

Exam Table:	See Chapter 3
Refrigerator:	See Chapter 3
Portable Radiology Unit:	See Chapter 5 (Class 2A Only)
Microscope:	See Chapter 6
Water Test Kit, Bacteriological:	See Chapter 8
Meter, Electric Heat Stress (WGBT):	See Chapter 8

F. Instructions for Maintaining, Issuing, and Inventorying Health Care Supplies and Equipment.

1. Units shall maintain an inventory system (Cardex, SAMS, CM PLUS, other software, etc.) as is consistent with good inventory management. Minimally, this system shall maintain current inventories of “bulk” stock items noting purchases, receipt of goods, and issuance to working stock. In cases where, due to small quantities, working and bulk stock are the same, records shall be kept of initial receipt of the item.
2. Inventories shall be “rotated”, with older items being used first, to minimize loss due to expiration or deterioration.
3. Units shall conduct and document quarterly inventories of all expendable medical supplies. During this inventory, any evidence of deterioration or contamination shall be noted and the item removed from service if required.
4. Units shall strictly adhere to expiration dating of items where applicable. Unless otherwise expiration dated, expendable medical supplies (bandaging materials, etc.) shall not be used after ten years from the date of manufacture.
5. To minimize waste due to drug expiration, units must monitor results of the Department of Defense (DOD) Shelf-Life program and modify expiration dates on tested items. Procedures for this program are contained in Chapter 10 of Medical Manual COMDTINST M6000.1B. An attempt should be made to trade any drugs that are within four months of expiration with the units collateral duty pharmacy officer, thus avoiding waste due to expiration.
6. Methods used to remove or destroy expired items shall be in compliance with State and local regulations and the Medical Manual, COMDTINST M6000.1B, Chapter 8.
7. Units shall maintain all messages related to medical product recalls or quality assurance problems for three years from the date of issue. Each message shall be initialed by the health care personnel and a note made as to any remedial action required by the message.

Chapter 2. EMERGENCY MEDICAL AND MILITARY READINESS EQUIPMENT AND SUPPLIES

A. General Information.

1. Point of Contact for all information in this chapter is Commandant (G-WKH-1).
2. General information in this section pertains to equipment and supplies required for both emergency medical care and military readiness.
3. All required items for military readiness (Battle Dressing Stations, Portable Medical Lockers, First Aid Kits, etc.) and emergency medical care (EMT Kits, Oxygen, etc.) shall be inventoried quarterly and inspected monthly for tampering, rust, cleanliness, deterioration, and expiration. A log shall be maintained within sickbay to document the findings of these inspections and the remedial action taken.
4. Whenever possible, all emergency medical and military readiness kits and equipment shall be secured away from weather decks.
5. Expired medical supplies (with the exception of pharmaceuticals) may be retained for training. These items should be maintained away from other usable supplies and be marked clearly: "TRAINING ONLY - NOT FOR MEDICAL USE."
6. Many of the required items are only available from commercial sources. Units procuring these items are encouraged to check several sources for the most cost-effective source.

B. Emergency Medical Equipment and Supplies.

1. This section includes kits, equipment, and supplies required to provide emergency medical care. Certain equipment will also be applicable to section "E" (Military Readiness) of this chapter.
2. Emergency medical equipment not listed in this publication or Coast Guard Rescue and Survival Systems Manual, COMDTINST M10470.10, and costing in excess of \$300.00 is **NOT** authorized for local purchase. Units may request consideration for additional emergency medical equipment via CG-5211 to Maintenance and Logistics Command (k).

D. Oxygen/Resuscitation Equipment.

1. Oxygen cylinders must never come in contact with organic lubricant (oil, grease, etc.). Cylinders shall be stored in a permanently mounted rack in an upright position at all times unless in use within a portable container. All oxygen delivery and resuscitation equipment will be inspected weekly, inspection shall be documented with the kit and in the medical department log. A three part tagging system (full, in use, empty), shall be utilized to indicate status of tank. All medical oxygen containers shall be labeled "MEDICAL USE ONLY." All cylinders shall be hydrostatically tested every five years. To clear dust particles, crack the tank valve slightly prior to applying a regulator to a new bottle. Make sure the tank valve is open before the oxygen delivery equipment (mask, etc.) is applied to the patient. Ensure that a non-ferrous wrench is used for tank manipulation.
2. A minimum of one "H" oxygen cylinder, containing a pressure regulator to deliver positive pressure oxygen, shall be mounted in all Class 2A-vessel sickbays.

Portable Oxygen Requirements	2A	2B	2C	2D
Size “D” cylinder contains approx. 350 liters filled	10 hrs	6 hrs	4 hrs	4 hrs
Size “E” contains approx. 625 liters filled	24 hrs	18 hrs	12 hrs	12 hrs
Size “Super D” contains approx. 637 liters filled	Size Super “D” may be used instead of Size “E”. Minimum Oxygen requirements for Size “E” must be met.			

3. Non-rebreather masks shall be used for patients in critical need of oxygen. Prior to placing non-rebreather masks on the patient, care should be taken to fully inflate the oxygen reservoir bag.
4. CG vessels (USCGC Polar Star, USCGC Polar Sea, USCGC Healy, USCGC Kukui, USCGC Sassafras, USCGC Walnut) with permanently assigned dive teams are authorized the following additional emergency oxygen delivery equipment:
 - 1 - Oxygen Resuscitation Set (Life-saving Systems Product (LSP), (Commercial Purchase), with a minimum of two “D” size oxygen cylinders

Note: A Divers Alert Network (DAN) Oxygen Delivery Kit
Commercial source may be substituted for the LSP Kit.

- 1 - Bag Valve Resuscitator with minimum of four adult non-rebreather face masks, medium and large adult face mask for positive pressure delivery and bag valve mask unit, 1 - Life Saver Airway Set.

- 1 - Box of disposable gloves.

This equipment shall be for use by Dive Team Members only. The unit will be maintained in sickbay by the unit HS and used only during diving operations.

E. Litters and Stretchers.

1. Flotation Stokes. A minimum of one stokes litter will be maintained with flotation devices permanently affixed. Each end of the litter shall have a minimum of 20 feet (or longer based on ship’s configuration), of 21 thread manila line permanently secured with a minimum of 4 – 5 tucks on each splice. The line will allow the stretcher to be handled from the main deck of the ship and above. A minimum of three patient securing straps shall be permanently affixed to the stretcher and stopped with twine. When possible the stretcher shall be secured away from weather and exposure to salt and ultraviolet (UV) light.

NOTE

Only steel litters are authorized for any hoisting operations, including high-line operations. The folding stokes litter is the only litter authorized for helicopter hoisting operations. All litters are to be configured and maintained in accordance with the Coast Guard Rescue and Survival Systems Manual, COMDTINST M10470.10 (series).

2. Medevac Rescue (SAR) Litter. Each ship will be required to have on board a full allowance of Medevac Rescue Litters. They are to be stored at or near the primary BDS, forward on the main deck, at or near after steering, and on the hangar deck (as applicable) and used by the repair locker stretcher bearer teams for use in rescue operations such as in-water, shipboard and confined spaces. Like the other litters used on board ship, the HS is responsible for the care, maintenance and training in the use of the Medevac Rescue Litter. A Horizontal Hoisting Sling and Trail Line Assembly must be purchased for hoisting operations.

F. Military Readiness.

1. First Aid Kit, Life Raft. Each Life Raft comes equipped with a first aid kit. Below is a list of the contents of the first aid kit. Do not open life rafts to inspect or inventory first aid kits.

2. First Aid Kits, Gun Bag. These kits shall be placed throughout the vessel for emergency use. They shall also be available for all stretcher-bearer personnel. The kits shall be inventoried quarterly and inspected monthly or immediately after use. The contents of these kits are listed in Figure (2-3). A minimum of one kit is **recommended** for each of the following:

- a. Each repair locker
- b. Each stretcher-bearer crew
- c. Bridge
- d. Main Control/Engine room
- e. Crew's Mess Deck/Galley
- f. Radio, ET Shop and/or CIC
- g. Flight Deck/Avionics Shop (If applicable)
- h. Buoy Deck/Bosun's Hole (If applicable)
- i. After Steering (If applicable)
- j. 76MM Magazine (If applicable)
- k. 50 cal Locker (If applicable)
- l. Auxiliary Space I or II (If applicable)
- m. DC Shop
- n. Armory

A first aid kit should be made available for issue to deployable teams (AMIO, Law Enforcement or any other deployable teams). Supplies should be inventoried monthly or immediately after use. A separate gun bag can be used for these occasions.

3. Battle Dressing Stations (BDS).

- a. Although primarily designed for wartime use, the BDS may be used for any incident involving significant numbers of casualties. An inventory with expiration dates shall be compiled and posted at the BDS. Any equipment shall have operating instructions posted with the inventory list. Supplies and equipment shall be inventoried quarterly or immediately after use.
- b. Vessel BDS Requirements: (BDS Contents are listed in Figure 2-4)
 - Class 2A & 2B Primary and Secondary (One Each)
 - Class 2C & 2D Primary Only
- c. The BDS locations shall be determined by the commanding officer of the vessel, with regards to the ship's configuration and needs of the medical department. These areas shall be designated in writing and posted in the ships operational plan and sickbay operating plan. The BDS shall be large enough to support the medical care of larger numbers of casualties (i.e., crew's mess deck, wardroom, etc.).

5. Decontamination Locker (For Class 2 Vessels With CBR Requirements Only).

- a. Decontamination lockers will be stored at shore facilities designated by the Area Commander, and will be transferred to the unit when the capability is required.
- b. When on board the decontamination lockers shall be maintained at or near each saltwater decontamination station as designated in the ships design. An inventory list (figure 2-6) shall be posted outside the locker. This inventory shall include as a minimum, nomenclature, quantity, quality control data, and documented date of inspections. Decon lockers are to be inspected monthly and inventoried quarterly.
- c. Decontamination Locker Requirements: One or two per vessel as required by ships configuration.

6. Antidote Locker.

- a. All Class 2 Units shall maintain a properly labeled ("POISON ANTIDOTE LOCKER") antidote locker outside sickbay. An inventory list with expiration dates shall be affixed to the outside and the locker shall be sealed in such a manner to ensure that tampering has not occurred. See (figure 2-7) for required contents.
- b. Antidote lockers shall be inspected monthly and inventoried quarterly.
- c. Class 2 units shall maintain the antidote locker contents in:
LOCKER, MEDICAL, FIRST AID OR POISON ANTIDOTE U/I EA
- d. Poison Control Center phone numbers shall be posted on the outside of the antidote locker. (Ensure this number can be reached from any area the ship is deployed to.)
- e. Each antidote locker shall have a pocket mask readily available within it.

CHAPTER 3 CLINICAL MEDICINE

A. General Information.

1. Point of contact for information in this chapter is Commandant (G-WKH-1).
2. This section contains a list of required health care materials (consumable supplies, minor and major equipment, sets, and outfits) necessary to provide initial outfitting and set minimum requirements for Coast Guard units.
3. Items that are added to this list from time-to-time shall not be requisitioned if a similar item on hand is functionally adequate to accomplish the intended purpose.
4. In some cases, items contained in this chapter are also mentioned in other chapters of this publication. **Required items need not be duplicated if they are listed in another section of the HSAL other than the BDS.**

B. Required Clinical Medicine, Equipment and Supplies.

CHAPTER 4. PHARMACEUTICALS

A. General Information.

1. Point of contact for information related to pharmaceuticals, pharmacy supplies and references is Commandant (G-WKH-2), Pharmacy Program Coordinator.
2. HSs assigned to Class 2 units shall maintain drug formularies consisting of:
 - a. 90 day supply of products, based on HS preference, selected from the Standardized Health Services Technician Formulary (COMDTINST 6570.1).
 - b. HSAL medications required by this Instruction.
 - c. A limited quantity of other medications for which crewmembers have prescriptions. These medications should only be used for the crewmember with a previous prescription unless medical officer consultation directs their use for another crewmember and/or patient. Upon discontinuance of the medication or PCS of the crewmember, the medication shall be returned immediately to the CG pharmacy responsible for the vessel.
 - d. Items authorized for distribution via the Coast Guard Nonprescription Medication Program.
 - e. Other medications which the HS has agreed upon in writing to stock for active duty personnel for their Designated Medical Officer Advisor or a local contract prescriber. The stocking of other medications on Class 2 vessels is NOT authorized.
3. Pharmaceuticals are expiration dated and shall be rotated to avoid waste. It is the HS's responsibility to minimize waste by maximizing stock rotation through their responsible pharmacy officer.
4. Only the controlled substances listed are authorized for procurement by Class 2 units. Units should contact their responsible pharmacy officer for obtaining the required controlled medications. All controlled substance transaction records shall be kept for three years.
5. All pharmaceuticals are pharmacy officer-supplied items. Consult the pharmacy officer assigned responsibility for your unit for procurement request information.
6. The "Notes" Section of this list uses the following codes:

"C" Controlled Substance
"R" Refrigerated Item
7. Also enclosed in this section is the list of items authorized for use in over-the-counter programs if the unit should opt to provide this service. Other information concerning this program can be found in Medical Manual, COMDTINST 6000.1 (series).
8. Manufacturer's drug samples shall not be stored or used on Class 2 units.

B. Required Pharmaceuticals.

CHAPTER 7 - DENTAL SUPPLIES AND EQUIPMENT

A. General Information.

1. Point of contact for comments/information related to dental equipment and supplies is Commandant (G-WKH-2), Dental Program Manager.
2. The best way to deal with dental emergencies is to prevent them. HSs must pay close attention to the dental health status of their crewmembers, ensuring that required examinations and treatment are completed before getting underway.
3. Nevertheless, the nature of sea duty is such that dental emergencies will arise periodically. While rarely serious, these emergencies can be extremely painful and can serve to debilitate any sailor. A working knowledge of the drug locker, especially antibiotic and analgesic medications, is essential in the management of dental emergencies at sea.

B. Required Dental Equipment and Supplies.

The following are the minimum requirements for dental instruments, equipment, and supplies, which shall be maintained onboard vessels. Items needing sterilization shall be sterilized (as needed) by your supporting clinic.

Disposable items are authorized and encouraged if available.

CHAPTER 8. ENVIRONMENTAL HEALTH

A. General Information.

1. Point of contact for comments/information related to environmental health equipment and supplies is Commandant (G-WKS-2), Environmental Health Program Manager.
2. The commanding officer is responsible for the health and readiness of the command (Medical Manual COMDTINST M6000.1B, Chapter 1). The health services department is charged with advising the commanding officer of conditions existing that may be detrimental to the health of personnel and for making appropriate recommendations for correcting such conditions. Meticulous attention to all details and aspects of preventing disease must be a continuing program. It is imperative that shipboard and station sanitation and preventive health practices be reviewed constantly in order that any disease-promoting situation may be discovered immediately and promptly eradicated.
3. Environmental health includes the following program areas:
 - a. Food service sanitation
 - b. Potable water supply
 - c. Pest control
 - d. Habitability
 - e. Wastewater treatment and disposal
 - f. Swimming pools
 - g. Disease control
 - h. Exposure to chemical, physical, or biological agents

B. Required Environmental Health Equipment and Supplies.

1. The following are the minimum requirements for environmental health equipment, and supplies, which shall be, maintained onboard vessels. All listed items are standard stock.
